CARE AND USE

ACRYLIC BATHS: The glossy/matte acrylic finish should be regularly wiped clean with non scouring, neutral wash solutions. Avoid abrasive cleaners or use mild abrasives sparingly if absolutely necessary.

STONE RESIN BASINS AND BATHS: The gloss finish on these products is a generous layer of 'gel-coat' which should be regularly wiped clean with non scouring, neutral wash solutions. Lost luster can be returned using a similar range of products you might use to polish a car paint job. For severe scratching start with a cutting compound and only use wet and dry sand papers if absolutely necessary beginning with 1000 grit or 800 grit if required. Rub only very lightly with plenty of water to avoid scratching or penetrating the gel-coat surface layer.

The matte finish on these products should be regularly wiped clean with non scouring, neutral wash solutions or a mild abrasive as required. For severe scratching use wet and dry sand papers beginning with 1000 grit or 800 grit if required. Rub only very lightly with plenty of water to avoid scratching.

CABINETS: Wood veneers, laminates or lacquered finishes should be regularly wiped clean with non scouring, neutral wash solutions. Never use an abrasive cleaner or petroleum based products.

MIRRORS: For best results use a moistened microfibre cloth to remove dry dirt or grime, followed by cleaning with a dry microfibre cloth.

Avoid using alkaline (ammonia) or acid (vinegar) based products you not only risk damaging the silvered backing of the mirror, but also tend to leave behind streaks and smears.

TOILETS: Vitreous china finishes are best cleaned with cream or mild abrasive toilet specific cleaners. Do not use harsh abrasives on the toilet seat surfaces.

OXFORD

INWALL COLLECTION

The Concealed Attraction of an Oxford In-Wall Cistern

An In-wall Cistern is mounted behind the wall, creating a practical and elegant finish to your bathroom or powder room. These hidden gems subtly transform bathrooms into havens of understated style and space. Their unassuming presence brings forth measurable benefits:

Appreciate the hushed flushes that blend seamlessly into your bathroom or powder room.

Revel in ease of maintenance where unbroken lines promote effortless cleaning.

In their concealment, in-wall cisterns provide modern conveniences - with simple designs and push button face plates that are easy to use, suiting users of all ages. A choice of finishes integrating into any décor.

Consider well before installation - determine optimal access points and wall depths through consultations with builders and plumbers. Though initial costs may be higher, the long-term gains in aesthetics and functionality prove worthwhile.

Let Oxford in-wall cisterns subtly elevate your bathrooms. Whether blending seamlessly within intimate retreats or family-friendly spaces, their understated presence promotes style.

OXFORD IN-WALL CISTERNS

Behind the wall flushing systems

The Oxford Pneumatic Slim In-Wall Cisterns and Faceplates are a cutting-edge solution for modern bathrooms. These innovative cisterns are designed specifically to be used with Oxford faceplates and wall hung and floor pans. The cisterns offer a seamless and sleek installation with their pneumatic flushing mechanism, and they provide a powerful and efficient flush every time, surpassing traditional mechanical mechanisms.
